

## Information sheet V

### Labelling/claims of “<95% products”, “hunting/fishing products with organic ingredients”, in-conversion products

#### Labelling/claims “<95% products”<sup>1</sup>

##### Requirement:

- Products with conventional ingredients of agricultural origin that are positively approved according to the organic regulation<sup>2</sup>
- More than 5% by weight of the agricultural ingredients in the product are non-organic (conventional)

##### Labelling:

- These products must not have an organic reference in the sales description (with the product name)
- The list of ingredients shall indicate which ingredients are organic
- The total percentage of organic ingredients in proportion to the total quantity of agricultural ingredients shall be included in the list of ingredients
- In addition to the organic information, the label must also state the “code number of the responsible control body”<sup>3</sup>
- The EU organic logo MAY NOT be used

In the case of semi-finished products, finished products made with them may be advertised as organic products if the proportion of conventional ingredients falls below 5% due to the mixing ratio.

<sup>1</sup>until 13.12.2021 in Annex IX of Regulation (EC) 889/2008 current version or from 01.01.2024 in Annex V Part B of Regulation (EU) 2021/1165, current version

<sup>2</sup>according to Annex V of Regulation (EU) 2021/1165, current version (marked with an asterisk (\*) in the "Code" column) or according to the "positive list"<sup>1</sup> or for which a member state has granted a provisionally authorization for the use of non-organic agricultural ingredients

<sup>3</sup>the code number of the control authority or control body to which the operator that carried out the last production or preparation operation is subject

**Labelling/claims of "products from hunting or fishing with ingredients from organic production"<sup>4</sup>****Requirement:**

- Products whose main ingredient is a product of hunting or fishing and
- otherwise contain only organic ingredients and
- in the production of which only the products, substances, food processing additives and processing aids permitted for the organic production of food are used

**Labelling:**

- May carry an organic claim in the sales denomination (next to the product name) provided that the organic claim in the sales denomination is clearly linked to another ingredient that is organic and different from the main ingredient
- The list of ingredients shall indicate which ingredients are organic
- The total percentage of organic ingredients in proportion to the total quantity of agricultural ingredients shall be included in the list of ingredients
- In addition to the organic information, the label must also state the "code number of the responsible control body"<sup>3</sup>
- The EU organic logo MAY NOT be used

**Labelling/claims of in-conversion products (products produced during the conversion period<sup>5</sup>)****Requirement:**

- Product manufactured during the conversion period<sup>5</sup>
- Only applicable to mono-products (products containing only one agricultural ingredient)
- The term "in-conversion product" only exists in the processing area for vegetable raw materials. There are no animal "conversion products"

**Labelling:**

- These products MAY NOT be labeled as "organic".
- They may be labeled as "in-conversion products" or "products from conversion to organic production"
- In addition to the organic information, the label must also state the "code number of the responsible control body"<sup>3</sup>
- The EU organic logo MAY NOT be used

<sup>3</sup>the code number of the control authority or control body to which the operator that carried out the last production or preparation operation is subject

<sup>4</sup>according to Regulation (EU) 2018/848, current version, Chapter IV, Article 30, (5), c)

<sup>5</sup>according to Regulation (EU) 2018/848, current version, Article 10
